DISPENSERS GROUP

Sample 4

The DISPENSERS GROUP can be used only for the WORK IN RESUMPTO N and feed a SHRINK FILM machine at the rate of 40 Trays/mn

- In this case, a PLASTIC COVER dispenser, a TOPTRAY dispenser and a LABEL inserter are working in resumption.
- Every dispenser unit is replacable with an other.
- Every dispenser is able to run at the speed of 40 trays/mn.
(The LABEL inserter also exists with double head and double interchangeable magazine)
- The LABEL inserter can be completed with an additional immobilization kit (point of glue).
With such equipment, it's possible to lay in very precise position light and small labels.
- As well, a TRANSLATORY UNIT for ink jet head can be set just after the LABEL inserter.
With such equipment, it's possible to date and to customize standard labels
